UNH Center for International Education (CIE) cordially invites you…

**Spring 2015 – NH INTERNATIONAL SEMINAR**

**UNH Faculty Abroad Series**  
Tuesday, February 24th  
12:40-2:00 p.m. • MUB Theater I

---

**Drew Conroy**  
Professor of Applied Animal Science

**Talk (open to all):**  
*Wildlife Conservation and Agricultural Development in Eastern and Southern Africa*

Improving agricultural production in Africa is critical, given its projected population growth. Using examples ranging from the war-torn Eastern Congo to Namibia's highly regarded Community Based Natural Resource Management (CBNRM) conservation initiatives, Professor Conroy will discuss both successes and failures in the integration of agriculture with the protection of Africa's unique landscapes, amazing biodiversity and wildlife.

Drew Conroy is Professor of Integrated Agriculture and Applied Animal Science at the UNH Thompson School. He holds a Ph.D. in Natural Resources, and conducted his Ph.D. fieldwork in Tanzania with the Maasai people. Since 1995 he has worked in and out of Africa, as a researcher, consultant, mentor and guide. Dr. Conroy has mentored numerous undergraduates who have conducted research in Tanzania and Namibia. He was also a Fulbright Scholar in Namibia (2008) and looks forward to his second Fulbright in Rwanda next year.

Visit CIE to learn about the International Affairs dual major and minor, exciting study abroad opportunities, and faculty development.
